---

## Objective:-

Back-End Developer with 3+ years of experience in Laravel & PHP, specialized in building scalable systems (E-commerce, ERP, E-learning). Proficient in applying design patterns and SOLID principles to deliver maintainable and robust applications. Seeking to contribute expertise to a professional team by optimizing back-end performance and delivering high-quality solutions.

---

## Education: -

- **Abbassia Institute for Commercial Sciences and Computer Technology**  
*Major: Management Information Systems (MIS)*  
**Graduation Year:** 2016
  - **Information Technology Institute (ITI) – Aswan-Egypt**  
*Track: Web Development using PHP*  
**Completed:** 2022 – Full scholarship
- 

## Skills:-

- **Languages & Frameworks:** PHP, Laravel Framework, Restful APIs, MySQL
- **Authentication & Security:** Laravel Sanctum, Roles & Permissions, Validation
- **Front-end & UI Tools:** Blade, Bootstrap, j Query, AJAX
- **Architecture & Patterns:** Repository Pattern, Service Layer, MVC
- **Performance & Utilities:** Caching, Events, Queues, Notifications
- **Tools & Others:** Git, GitHub, XAMPP/Os-panel, VS Code, Unit Testing (PHP-Unit)
- **Concepts:** SOLID Principles, OOP
- **API Documentation:** Postman

## Experience:-

### **Back-end Web Developer – Be Group**

*March 2024 – Present*

- Built and maintained multiple E-commerce platforms with advanced features (cart, checkout, discounts, reports).
- Developed business profile websites for various clients with custom admin panels.
- Contributed to E-learning platform modules, supporting user tracking and content management.
- Worked with Laravel, Restful APIs, Sanctum, and custom dashboards.

### **Back-end Developer – Ratio**

*March 2023 – February 2024*

- Developed and maintained a complete ERP system (stock, invoices, users, permissions).
- Participated in building and maintaining E-learning systems with course and user logic.
- Worked heavily with Queues, Events, Repositories, and permission management in Laravel.

### **Freelance Laravel Developer**

*August 2022 – February 2023*

- Delivered custom POS (Point of Sale) systems using Laravel and MySQL.
- Built small-scale E-commerce and business websites for local clients.
- Handled full development life cycle: database design, back-end logic, and Blade integration.

---

## Projects

- **E-commerce Platforms:**

**becooleg.com:-** Scalable E-commerce platform  
Product variants with advanced filtering (attributes, categories, brands, price).  
Seamless checkout for guest and registered users,

**ihome-eg.com:-** E-commerce with dynamic shipping  
Advanced filtering system with categories, brands, and price.  
Integrated dynamic shipping fee calculator with multiple options.

**virginiabeds.com:-** Attribute-based pricing  
Product variants with dynamic price calculation.  
Advanced filtering and secure checkout system.

**Altaleb:-** Multi-vendor platform  
Independent vendor dashboards with product and order management.  
Integrated advanced filtering for better product discovery.

- **E-learning Platform:**

**sabaa30.com:-** Student Dashboard  
Built course tracking, exams, and results features.  
Applied SOLID principles for maintainable architecture.

[betraining.com](https://betraining.com) – Scalability Consultation

Provided architectural improvements for scalability and maintainability.

Recommended modular design, caching, and clean code practices.

- **ERP:**

**ERP System** – Saudi Arabia

Technical Support for Delegate, HR, and Accounting modules.

Fixed issues, optimized performance, and suggested system improvements.

---

## Achievements

- **Developed and launched 30+ professional websites and business profiles** across healthcare, education, manufacturing, and e-commerce, delivering scalable and maintainable solutions.
- **Built advanced E-commerce systems** with product variants, attribute-based price calculation, guest checkout, advanced filtering, and multi-vendor support — improving user experience and business growth.
- **Optimized back-end performance** in multiple Laravel projects by applying caching, queues, and query optimization — reducing load times and improving system reliability.
- **Improved SEO rankings** for healthcare and business websites (e.g., Drammar Clinics, Damas Clinics) through performance tuning, structured data, and local SEO practices, resulting in higher visibility.
- **Contributed to ERP and E-learning platforms** by building dashboards, fixing critical issues, and suggesting architectural improvements (SOLID principles, modular design) to ensure long-term scalability.

---

## Personal Skills

- Debugging & Troubleshooting
- Writing clean & maintainable code
- Agile teamwork
- Strong problem solving

---

## Language

- Arabic - Native
- English – Intermediate (good technical communication).
